Agriculture, the farmer and JAINS

Through 42 years of dedicated service to farming and the farmer, JAINS have established a permanent bond with them, Agriculture and the farming community. To improve the lot of farmers, Jain Irrigation brought to this country, a new & revolutionary concept- Jain Micro Irrigation System - the most modern irrigation technology the world has evolved. Through continuous research and development efforts, JAINS made it their mission to adopt this technology to suit all types of soils and agro climatic conditions. Today Jain Irrigation has become synonymous with Micro Irrigation. Be it for Apples in Kashmir or Coconuts in Kerala, Tea in Assam or Cotton in Gujrat, the Indian farmer prefers only one system - the Jain Micro Irrigation System. No wonder that JAINS have till date covered 1,500,000 acres for 48 different types of crops in all corners of the country. JAINS have not only been exporting Micro Irrigation Systems and components to more than 35 countries, but also have been executing large turn-key agricultural and irrigation projects in various parts of the world and have completed these on a time bound schedule. JAIN products and prices compare favourably with the best in the world.

Jain Drip: A Total System Approach

Water- Nature's boon to mankind is neither unlimited nor free forever. World water resources are fast diminishing. The one and the only answer to this problem is Jain Drip (Micro) Irrigation Systems. After detailed study of inter-relationship among soil, water, crop, land terrain and agro climatic conditions, Jains design a suitable and economically viable system to deliver a measured quantity of water at the root zone of each plant at regular intervals, to ensure that the plants do not suffer from stress or strain. The system installed at the farmer's field is commissioned and training is imparted to the farmer, followed by regular after sales services. The result - A totally customized, efficient and long-life system which ensures saving in water, early maturity, bountiful harvest, season after season, year after year, apart from saving in labour and fertilizer cost. Install Jain Drip and join the happy family of Jain Drip System owners.

JAIN MICRO IRRIGATION SYSTEMS
The world's best known technology for irrigation and water management, perfected to suit small & marginal farmers in tropical and subtropical conditions, by Jain Irrigation Systems Ltd.
