

# Vari Flow Dripper

## Features & Benefits

### Adjustable Flow

Easy to adjust according to changing crops and crop water requirement .

### Flow Adjustment from 0 to 50 & 0 to 100 lph

Complete shut off possible when water is not needed. Maximum flow at 1kg/cm<sup>2</sup> pressure on full opening is 50 lph & 100 lph.

### Simple Two Piece Take Apart Construction

Two piece design facilitates ease of maintenance.

### Protected Outlet

Protected outlet prevents entrance of sand/soil in desert/sandy soil conditions.

## Applications

- Suitable for trees having high water requirement.
- Recommended for sandy soils / desert conditions.
- Can also be used for lower pressure.

## Specifications

Code	Maximum Discharge*		Cap Colour
	lph	gph	
VF050	50	13.21	Blue
VF100	100	26.42	Green

\* At an operating pressure of 1kg/cm<sup>2</sup> (14.22 psi).
