

FOGGER & MICRO SPRINKLER STABILIZING WEIGHT

Stable. Stackable. Reliable.

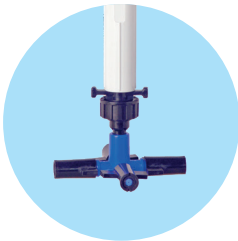

Superior Stability

Keeps foggers and micro sprinklers vertically aligned for consistent misting and spraying.

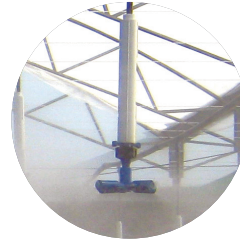

Modular & Stackable

Multiple weights can be easily connected for added stability and length adjustment.

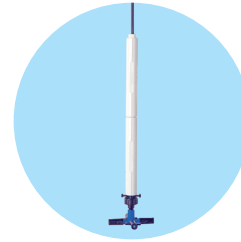

Secure holding of the LPD/ fogger

The fogger weight holds the Jain LPD securely thus reducing drift and misdirection of mist or water.

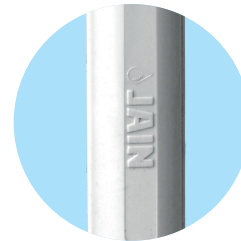

Anti-Wobble Design

Prevents movement during operation, ensuring uniform coverage.

Space-Efficient Shape

The vertical cylindrical form covers a larger tube surface, prevents banana effect of the tube and helps to keep the tube straight

Durable Material

Made from high-grade PVC, suitable for humid greenhouse environments for long-term reliability

Fogger & Micro Sprinkler Stabilizing Weight

The Fogger & Micro Sprinkler Stabilizing Weight is designed to ensure vertical alignment and steady operation of irrigation assemblies in greenhouses. Its high-grade PVC construction and modular design offer durability and flexibility in various environmental conditions

Application

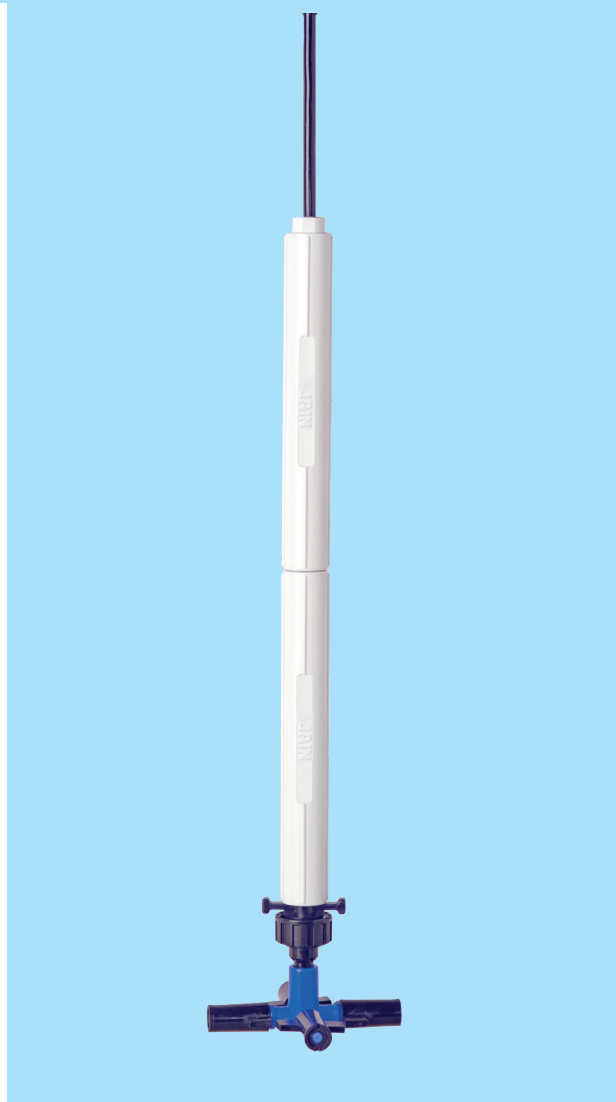

- Overhead fogger assemblies
- Micro sprinkler installations
- Climate control misting systems
- Nursery and propagation areas

Specifications

Parameter	Details
Material	High-grade PVC
Shape	Vertical cylinder
Weight	29.5 grams
Compatibility	Standard fogger & micro sprinkler assemblies
Connectivity	Interlocking/stackable ends
Suitable tube size	Maximum up to 8 mm OD Vinyl/ Soft PE tube
Application Areas	Greenhouses, nurseries, indoor farms
